## THEMES OF THE CONFERENCE

Cyber Crime is the fastest growing threat to people & businesses globally. As the number of data networks, digital applications, as well as internet and mobile users are growing, so do the chances of cyber exploitation and cyber-crimes. Even a small mistake in securing data or bad social networking can prove to be extremely dangerous. If accounts are not properly secured, it makes easier for hackers or unauthorized users to spread viruses or social engineered attacks that are designed to steal data and even money. Such types of issues highlight the need for cyber security as an essential approach in protecting and preventing data from being used inappropriately. Latest Trends in Cyber Security conference seeks to change the paradigm of how we look at digital space and security, critically assessing cyber security's impact on our country and people and its security implications. Also, this

conference explores the boundaries of cyber security and also provides the best practices to protect our Digital Critical Infrastructure where the sensitivity of the data plays a very vital role.

## ABOUT NATIONAL CYBER SAFETY AND SECURITY STANDARDS

National Cyber Safety and Security Standards is carrying out extensive awareness, training and education campaigns, so that the public are made aware of the dangers of the internet, and how they should be careful and avoid falling into cyber traps. National Cyber Defence Research Centre has embarked on setting up cyber security research centres across India, with the objective of conducting research, training and hands on lab environment for universities, industry and professionals. These research labs will also be involved in detecting, analysing and preventing cyber threats/ attacks and forensics
